

Assignment 2 Report

GitHub link - <https://github.com/B00098299/assignment2/tree/master/web2>

I created my website using Dreamweaver. I stumbled upon many problems and messed up a lot typing code into the wrong media query which caused a lot of problem. I started to understand everything a lot more as I went on and have a fair grasp of it now. But this led to a lot of unnecessary CSS and going back fixing things and taking up a lot of time. I have made the site responsive by creating the site for landscape then using media query's I used breakpoints for 767 px and 600px. I moved and fit every element by adjusting width and height and using margins and padding to align and position. I used the iframe code to embed youtube videos from the electric picnic page with a bas resolution of 1200 x 720 then had them scaled down to fit the lower px screen. The Gallery turned out to be a lot harder than I wanted just from me clicking wrong media query's causing confusion and leading me to overlap with cod and inserting wrong code and trying to fix it. In the end I put each image into a div and positioned things that way. I went with a unique positioning rather than just aligned boxes just to try something. I think it looked good, I then changed the size and aligned them in lower px size pages. The gallery gave lots of problems from mistakes made that were hard to go and fix. I have a basic inbuilt navigation that the software gives us which acts well and scales as it should. Typography is very limited, but I used "Constantia, "Lucida Bright", "DejaVu Serif", Georgia, serif" in certain places I thought looked nice and fit. I would have liked more but when I would apply a new font it would change my text around enough to break my page in the end I

should have applied it first and thought more carefully about it. I ended up with about 900 lines of css but I think a good bit is redundant from overlapping and mistakes.

I do feel my design was let down this time from learning the new techniques as I went along, although I fully completed the lab it wasn't until I sat down for the assignment I full started to grasp everything. This does disappoint me and I wish I understood it better earlier. Parts of my alignment and even the position of some elements became very hard for me to control from mistakes made early on. I did validate my html and the only errors I found came from the iframe code which I didn't really mess with to avoid braking it and that I cant put a ul inside a ul. the rest were just warnings to suggest adding things like lang="en". I am very happy that I got through it and learned as much as I did. This is a very important part of web development and I do understand it a lot better now and I am happy that the outcome of the assignment is positive

CONAN & BOBES & CAITLYN & JESSICA

area or visit the Theatre of Food hosting some of the top chefs in the country cooking up a storm.

Phone Charging

Three will be selling 3 Power Banks in the Jimi Hendrix Campsite.

Opening Times

Friday 11:30am-6pm

Saturday 9am -6pm

Sunday 9am-6pm

IT'S MORE THAN JUST A MUSIC FESTIVAL

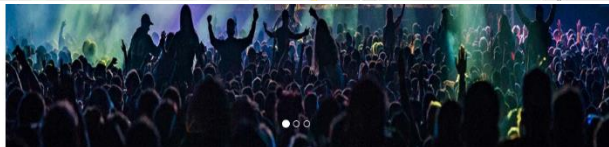

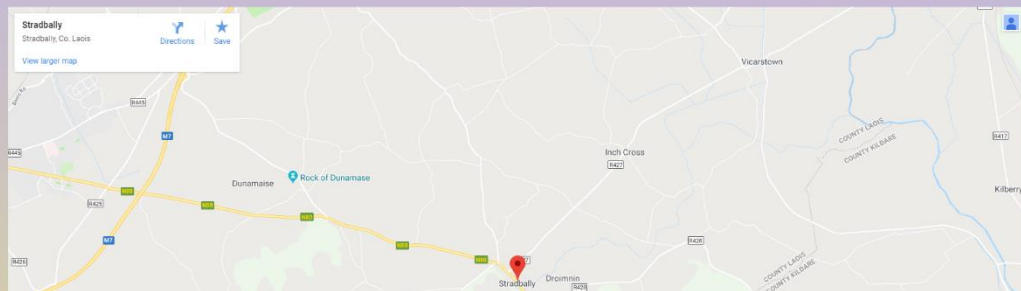

- **Art:** Explore a world of art and creation at Electric Picnic. Throughout the arena you will find sculptures and art work hidden in every nook and cranny. Over the years we have seen creations such as the Giant Gramophone, Washing Machine Maze, Goat Mountain, The WyrdWood Village, Fiddling Fox and Wicker People.
- **Comedy Tent:** Prepare yourself for a belly full of laughs as we provide you with some of the best established and up-and-coming comedians from around Ireland.
- **Greencrafts:** The Greencrafts village is a brilliant place to spend a while changing gear and making something beautiful to take home. Specializing in traditional (or some say forgotten) crafts – the organisers Nic and Marie have brought together some of Ireland's most exciting craft workshops, so you can choose from over forty things to make from silver rings, to wooden plates, felted scarves to iron pokers, slate pendants to willow baskets. and loads more.
- **Global Green:** On the edge of the Picnic you will discover the Global Green, the conscious heartbeat of Electric Picnic. It connects people to one another and creates a vision of possibilities, with engaging conversations, uplifting performances and food for the soul.
- **Mindfield:** The Mindfield spoken word arena boasts a stimulating spark-filled programme designed to entertain, inform and inflame. Set among the ancient trees on the lawns of Stradbally Hall you'll find an oasis of literary readings, political debate, performance poetry, science experiments, inspiring talks, news quizzes, public conversations and much more. The Mindfield Arena invites us to fill our brains with new thoughts, ideas and experiences that we hope will engage and help inspire us to all be change makers.
- **Theatre of Food:** Located in the Mindfield arena of Electric Picnic, the Theatre of Food features a line-up of chefs, writers, thinkers, artisans, brewers, bakers, and food heroes. It's a celebration of everything we love about food and drink - and music. Over the weekend you can expect food demonstrations, mixology, "Theatre of Food Tastes" treating the audience to delicious tastings of exciting foods almost every hour, talks, manifestos, food quizzes and much more.
- **Fosselt's Circus:** You will be transported into a world where aerialists defy death, jugglers defy gravity, acrobats defy description and the clowns simply defy everyone.

Electric Picnic 2019 Location

The event will be held at Stradbally Co Laois.

The location is easy to find and if you need more help you can click the "view larger map" button and get directions via google maps
